

Portfolio & Work Summary

Prasenjit Sarma,
Assistant Teacher, 847 No. Belortari LP School.
Barpeta Educational Block, Barpeta, Assam

As an Assistant Teacher, I have dedicated my career since June 1, 2012, to transforming education through innovation, technology, and deep community engagement. My journey has been driven by a steadfast commitment to fostering an equitable, inclusive, and impactful learning environment for all students. My total service duration, as of May 31, 2025, is 13 years.

Professional Background and Service Record

My teaching career began on June 1, 2012. I have served in three primary schools, consistently teaching classes 1 through 5.

- **1792 No. Paschim Aprupi LP School:** I served here for 4 years and 1 month. During this period, I taught English, Mathematics, Drawing, Assamese (Language 1), and EVS. The total enrollment was 134 students, and the result percentage was 75%.
- **Radha Madhab LP School:** My tenure here was 1 year, 2 months, and 19 days. I taught English, Mathematics, and Drawing. The school had a total enrollment of 124 students, with a result percentage of 70%.
- **847 No. Belortari LP School:** I joined my current school, 847 No. Belortari LP School (UDISE+ Code: 18050611601), located in Belortari Village, Barpeta Block, Barpeta District, Assam (Pin Code: 781301), on September 19, 2017. Here, I serve as an Assistant Teacher, teaching English, Mathematics, and Assamese (Language 1) to classes 1-5. My service duration at this school is 7 years, 9 months, and 20 days, with a total enrollment of 35 students and a result percentage of 77%. The school is a co-educational primary school managed by the Department of Education. My date of superannuation is March 1, 2046.

Pioneering Educational Technology

A significant part of my work has involved leveraging technology to enhance teaching and learning, particularly through the development of **AI-powered educational applications**. I conceptualized and built several tools that have gained widespread adoption and recognition across India:

- **Lesson Plan Creator AI:** This application stands as a vital resource for teachers, enabling the instant generation of comprehensive, structured, and activity-based lesson plans for any subject or grade level. It significantly reduces preparation time, ensures alignment with specific learning outcomes, and ultimately elevates classroom preparedness. Its widespread adoption by thousands of teachers across India, with over 16,000 lesson plans created daily, underscores its practical utility and impact on instructional delivery.
- **AI Teacher:** Designed as an intelligent tutor, AI Teacher simplifies complex topics from any subject, presenting them in an interactive and accessible manner. It also proactively suggests related topics for deeper understanding and can generate quizzes to assess student knowledge. This makes it an invaluable tool for school learners, self-learners, and even aspirants preparing for competitive examinations. Crucially, its availability in English, Hindi, Assamese, and Bodo languages ensures linguistic inclusivity and broader accessibility.
- **AI Proofreading Assistant:** This application meticulously checks grammar, spelling, and sentence structure, thereby refining written content. It serves as an indispensable aid for teachers in drafting materials, students preparing assignments, and anyone seeking to enhance their English writing proficiency through instant, AI-powered corrections. It actively supports users in their journey of learning English.

- **Assamese Lesson Plan Creator:** Recognizing the importance of regional language instruction, I specifically developed this app for Assamese medium schools. It empowers teachers to prepare structured, effective lesson plans directly in the Assamese language, thereby bolstering regional language education and ensuring culturally and linguistically inclusive teaching practices.
- **AI Writing Assistant:** This versatile application provides comprehensive assistance for writing essays, articles, letters, and assignments. It is an ideal tool for students, teachers, and even civil service aspirants. Beyond generating well-structured drafts, it guides users in refining their writing style and enhancing overall content quality.
- **Nipun Mitra (AI Chatbot):** A truly groundbreaking AI chatbot, Nipun Mitra offers instant responses to queries related to critical educational policies such as NEP 2020, NCF, Nipun Bharat, Nipun Axom, and FLN. Its remarkable capability to communicate in over 100 languages, including Assamese and Bodo, ensures wide accessibility. It also assists teachers in generating FLN-specific lesson plans and provides real-time support to educators and stakeholders, facilitating better classroom planning and a deeper understanding of policy frameworks.

These applications have been widely praised by the Hon'ble Chief Minister, Education Minister, and Samagra Shiksha Mission Director, and have been featured prominently in national and regional media, including Doordarshan.

Other Apps :

- **Sameeksha – Mock Gunotsav App:** This digital platform represents a significant innovation in educational assessment. Sameeksha is specifically designed to conduct Mock Gunotsav exercises in schools, instantly collecting school-wise and student-level performance data. This functionality enables real-time monitoring, informed academic planning, and proactive preparation ahead of official Gunotsav assessments. It stands as the first fully digital platform used for conducting Mock Gunotsav evaluations completely online. Its successful implementation in over 2000 schools across Barpeta and Bajali districts, covering more than 2.3 lakh students, has provided invaluable real-time data and actionable insights for continuous school improvement.
- **GameVerse – Learning with Fun App:** Recognizing the power of play in learning, GameVerse offers 16 interactive games designed to make education fun and engaging. Covering essential topics from mathematics, science, and language, the app effectively enhances foundational skills while keeping children actively involved through joyful, play-based learning experiences.
- **Sapta Chakra Yoga & Fitness App:** This holistic yoga and fitness application, created by me, was inaugurated by the ADC Education, Barpeta, on International Yoga Day. It provides a diverse library of Yoga asanas, meditations, pranayams, and health tools, alongside an activity tracker and meal planner, promoting the physical and mental well-being of both students and teachers.
- **99 Tools (A Multi-Calculator and Converter App):** This app features a vast collection of different types of calculators and converters, serving numerous purposes, including a strong emphasis on educational applications.

Beyond these applications, I developed and launched an **Online FLN Monitoring Tool**, which provides a comprehensive overview of Foundational Literacy and Numeracy (FLN) implementation at the school level, enabling academic monitoring and identifying areas of strength and gaps. I also created the

Recognizing the future importance of Artificial Intelligence and Robotics, I have actively participated in and conducted seminars across various districts in Assam, including Morigaon, Kamrup, Bajali, and Barpeta. These sessions aimed to raise awareness among students, teachers, and guardians about AI and Robotics as an elective subject introduced by SEBA. To further support this, I authored a book titled "Artificial Intelligence and Robotics".

In response to the challenges faced during the pandemic, I led the district-wide **Utkarsha Programme**, which focused on building ICT capacity among teachers. Through virtual training sessions, we trained hundreds of teachers in using tools like Google Forms, PowerPoint, and Screencastify for digital content creation and assessments. To further enrich the learning environment.

Authoring Educational Resources

My commitment to supporting the educational community extends to authorship. I have penned five educational books, serving as invaluable resources for teachers, students, and professionals:

- **BaLA: A Guide for Teachers:** This comprehensive guide facilitates the implementation of "Building as a Learning Aid" (BaLA), an innovative concept that transforms the physical school environment into a dynamic teaching tool.
- **Reading Corner Establishment and Maintenance:** This guidebook assists educators in creating and managing effective reading corners, fostering a love for reading among students.
- **Teachers' Handbook on FLN Learning Outcome:** A vital resource for strengthening Foundational Literacy and Numeracy (FLN) among young learners, this book offers structured classroom activities aligned with specific learning outcomes. It is available on Amazon (ISBN 13: 9798871492260).
- **Artificial Intelligence and Robotics:** Aligned with CBSE and SEBA curricula for classes 9 and 10, this book provides an accessible introduction to core AI concepts and robotics, complete with theoretical explanations, real-world applications, and hands-on projects. It is also available on Amazon (ISBN 13: 9798327278523).
- **Modern Techniques of Teaching English:** My latest work focuses on enhancing English language instruction through modern teaching strategies, covering innovative methods to improve communication, comprehension, vocabulary, and grammar. This book is available on Amazon (ISBN 13: 9798319316271).
- **Understanding Child Psychology** - ISBN 13 9798293558704. A practical book to help educators and parents understand child behavior, emotions, and mental development for better care and support.

In addition to these, I have published three early learning workbooks that focus Early Literacy & Numeracy -

- **My First ABC Book** - ISBN 13 9798294550875. An alphabet tracing and learning book for early learners to develop basic writing and recognition skills.
- **All in One English Workbook** - ISBN 13 9798296012289. A complete workbook on early English literacy, including phonics, vowels, sight words, CVC words, vocabulary, nouns, verbs, sentence formation, and more.
- **All in One Maths Numeracy Workbook** - ISBN 13 9798296000385. This workbook builds essential numeracy skills through activities on numbers, shapes, measurement, patterns, data handling etc.

These publications offer practical tools and strategies that improve teaching effectiveness, promote joyful learning, and encourage innovation in classroom environments, addressing vital areas such as foundational literacy, classroom design, digital education, and language proficiency.

Driving Community Initiatives and Infrastructure Development

I firmly believe that education thrives with strong community involvement. Through my **"Helping Hand"** initiative, I spearheaded the establishment of the first-ever digital classroom in a lower primary school in Assam, utilizing crowdfunding and local volunteer participation. This initiative also facilitated the

development of school infrastructure, including Medicinal Gardens and the implementation of BaLA designs, mobilizing crucial alumni and local support.

Other key community and infrastructure-focused initiatives include:

- **Annapurna Kitchen Garden & Dhanwantari Medicinal Garden:** These projects provide hands-on learning experiences in sustainability, agriculture, nutrition, botany, and health education.
- **Kuhipath Puthibharal Hanging Library:** An innovative approach to promoting a love for reading by creating visually appealing and accessible reading spaces.
- **Cleanliness Drives:** Under the Swachh Bharat Mission and WASH Programme, I organized cleanliness drives to instill a sense of responsibility and promote hygiene.
- **Ensuring Drinking Water Availability:** Collaborated with PHED through the Jal Jeevan Mission to provide essential amenities.
- **Vidyanjali Programme:** Successfully mobilized community support for physical equipment (e.g., ceiling fans, TVs, boundary walls) and volunteer services from local artisans, retired personnel, and educationists.
- **Social Audit Teams Training:** Actively trained social audit teams in schools to ensure transparency and accountability in school management.
- **Collaboration with NGOs:** Partnered with organizations like Aid Et Action and Piramal Foundation to implement academic enhancement initiatives and secure CSR contributions from local industries.

Fostering Collaborative Programs and Pedagogical Innovations

My approach to education is deeply rooted in collaboration and innovative pedagogy. I have conceptualized and implemented several programs aimed at improving school management, student engagement, and learning outcomes:

- **Teachers Parliament:** This program fosters collaborative school management by assigning individual responsibilities to teachers, leading to significant improvements in cleanliness, record-keeping, Mid-Day Meal management, learning outcomes, and co-curricular activities. I also organized mock elections to construct a Student Parliament, providing practical understanding of democratic processes.
- **Adarsh Avivawak Programme:** A unique initiative designed to celebrate and encourage engaged guardians, strengthening the parent-school partnership.
- **Saturday Clubs:** These clubs offer a variety of extracurricular activities, making school more enjoyable and fostering a sense of belonging, thereby increasing attendance.
- **Community Festival:** An annual event that brings together various stakeholders to promote community participation, cultural awareness, and reduce dropout rates.
- **Millet Week Observation and Cooking Competitions for PM Poshan Programme:** These initiatives promote nutrition and healthy eating habits, contributing to student well-being and attendance.
- **Quarterly SMC, SMDC, and Mother Group Meetings:** Regular meetings to ensure continuous monitoring, support for school activities, and addressing issues that might lead to dropouts.
- **School Twinning Programme:** Fosters collaboration and mutual learning between schools, enhancing the overall learning environment.
- **Vidyalay Bandhab Initiative:** Focuses on creating a supportive and engaging school atmosphere to encourage regular attendance.
- **Janbhagidari Programme on FLN and Nipun Bharat Mission:** Actively engaged the community in the educational process to improve foundational literacy and numeracy skills.

In my day-to-day teaching, I emphasize appropriate pedagogic approaches, including the **Four-Block Approach in Language Teaching** (Guided Reading, Self-Selected Reading, Writing, Word Study) and the **Early Literacy and Phonemic Skills (ELPS) Method for Numeracy Classrooms** (Interactive Math Lessons, Math Games, Real-Life Math Problems). I also implement differentiated instruction, formative

assessment, collaborative learning, storytelling, and role-playing to create a dynamic and supportive learning environment.

Leading Training and Capacity Building

I have consistently taken on roles that involve capacity building and mentoring fellow educators, driven by a commitment to fostering a supportive and collaborative educational environment:

- **Resource Person:** Since 2013, I have served as a Resource Person for numerous pedagogical trainings, including FLN, Reading Enhancement Programme, NISHTHA, Learning Outcome training, and workshops on NEP 2020. I guide teachers on implementing effective teaching strategies and developing a deeper understanding of foundational literacy and numeracy skills.
- **ICT Teachers' Training:** I have acted as a resource person multiple times for ICT teachers' training, guiding colleagues in the effective use of technology in education and the development of e-resources.
- **Utkarsha Programme:** During the pandemic, I led this district-wide initiative, training hundreds of teachers in using ICT tools like Google Forms, PowerPoint, and Screencastify for digital content creation and assessments.
- **Mentorship:** I successfully mentored PSS Bodo High School, guiding it from a C grade to an A+ grade in Gunotsav 2014 by focusing on school management, community participation, student attendance, learning outcomes, and co-curricular activities.
- **Block Resource Person (Academic):** In this role for Barpeta Educational Block, I am responsible for guiding and monitoring 349 schools and 36 Cluster Resource Centre Coordinators (CRCCs), ensuring effective school management and program implementation.
- **Training Module Development:** I prepared training modules for district-level Post-NAS training for teachers and for the Adult Education Department to train volunteer teachers.

Contributing to Social Awareness

My work extends beyond academic instruction to address critical social issues and promote student well-being:

- **POCSO Act and Child Safety Awareness:** I have coordinated and organized awareness programs on the Protection of Children from Sexual Offences (POCSO) Act and child safety in collaboration with Childline, creating a safe and secure learning environment.
- **Menstrual Hygiene Awareness:** I have organized and acted as a resource person in seminars and training events on menstrual hygiene, equipping students, especially girls, with essential knowledge.
- **Support for Children With Special Needs (CWSN):** I actively support CWSN through kit distribution, training teachers in inclusive education, and participating in medical camps to assess disabilities. I have also attended and spoken at Braille Day events, advocating for visually impaired students.
- **Nutrition and Hygiene Programs:** Collaborated with JSI India on the ANSH program, addressing nutrition, menstrual hygiene, and adolescence issues, including installing sanitary napkin vending machines and the "Ask Anshika" dropbox system for anonymous queries.

Recognition and Awards

My sustained efforts and innovative contributions have been recognized through several prestigious awards and felicitations:

- **District Teachers Award 2024**
- **Best Teacher Award by PB Foundation**
- **Sewa Ratna Award by Integrated Global University**
- **Felicitations by the Barpeta District Administration** (on Republic Day 2021 and 2024)

- **Felicitation by the Kamrup District Administration** (on Independence Day 2024)
- My best practices were featured in the first edition of **Prathamika journal** by the Directorate of Elementary Education Assam.
- My innovative initiatives, such as the Kuhipath Puthibharal Hanging Library and BaLA implementation, received praise from **NITI Aayog, Government of India**, through their official Twitter handle.
- My AI-powered educational applications received special praise from the **Hon'ble Chief Minister of Assam, Education Minister, and Mission Director of Samagra Shiksha, Assam**, and were featured in national media.

My journey as an educator has been defined by a relentless pursuit of excellence and a deep-seated belief in the transformative power of education. I am committed to continuing my work towards creating inclusive, engaging, and effective learning experiences that empower every learner to reach their full potential.

In Aspen's early days, says D'Amico, a teacher is reevaluating the learning process by leveraging innovative AI technology. His pioneering approach aims to measure students' understanding and retention of academic concepts. The teacher's efforts are being rewarded as a significant step towards modernizing education in the region. Praveen Sharma, from Aspen's education department, developed an AI application to reengage students' learning and teachers' teaching process. In a recent award fest, a local educational society celebrated the official launch of these groundbreaking apps designed to revolutionize education.

Aspen Board, Google's Play AI, Loconet: Unleashing the Power of Artificial Intelligence

The Loconet Play Creator, an invaluable tool for teachers, coupled with an AI teacher app for students, aims to enhance the learning experience. Additionally, an AI personalizing assistant caters to their needs by pushing content relevant to their learning pace and skill set.

The journey began in 2018 when Praveen Sharma, the developer, then CEO, pioneered a custom-built educational website, showcasing an early commitment to integrating technology into education. Initially, they spearheaded the first smart classroom in an LP school in India, leveraging cloud-based technology to bring innovation to the forefront.

Driving from a kindergarten to almost-level progress and technical education, the developers' passion for the technology field led them to delve into the realm of AI. This application, submitted to the creation of app that directly benefits teachers and students alike.

The past, officially launched on November 5, has seen rapid success, attracting an impressive 2.2 million users within just two days. The numbers continue to rise, underscoring the impact of these innovative solutions on the education landscape.

As the developers reflect on their journey, it's evident that a combination of hard work, expertise, technological curiosity, and a dedication to enhancing education has resulted in the creation of tools poised to make a lasting impact on the future of learning.

The meeting also heard the presentation by Kenneth R. Dunlap, president of Kentucky, Virginia, West Virginia, and Kentucky State, Principal of Radford College. Dunlap stressed the importance of the teacher's role in the classroom, emphasizing his suggestions for the training of the teachers.

The association then elected the following officers: President, Al Smith, a significant role in understanding the education system in Virginia.

The Bergen District Education Department has developed AI-based educational apps covering around 200 schools under them. The AI-based

Innovative Works

I have initiated and led several impactful projects and programs that have significantly improved the educational landscape. Here are brief descriptions of some of these initiatives:

CROWDFUNDING & COMMUNITY INVOLVEMENT

Recognizing the lack of digital classrooms in government-run primary schools, I launched a crowdfunding campaign titled "Helping Hand" to establish digital classrooms in five primary schools under the Nursery Cluster. This initiative garnered support from teachers, guardians, and local residents, leading to the successful creation of the first digital classroom at Barpeta Nursery cum Lower Primary School. The campaign's success marked the beginning of the 'e-Shiksha' program, which focuses on community participation in digital education. This initiative has not only introduced digital literacy but also improved student engagement and reduced absenteeism.

TEACHERS PARLIAMENT

The Teachers' Parliament is a transformative School Management and Leadership Building Programme that I conceptualized and implemented. This program assigns individual responsibilities to teachers, focusing on key areas such as cleanliness, record-keeping, Mid-Day Meal (MDM), learning outcomes, morning assembly, and co-curricular activities. By fostering teamwork and a sense of accountability among teachers, the Teachers' Parliament has significantly improved school management and enhanced the educational environment. This program has also led to observable improvements in academic performance across schools in the Nursery Cluster.

ADARSH AVIVAWAK

The Adarsh Avivawak Programme is an initiative aimed at recognizing and celebrating the exemplary role of guardians in their children's education and well-being. Under this program, schools select the "Best Guardian of the Month" based on specific criteria highlighting their commitment and involvement. The chosen guardians are honored during the morning assembly on the last day of every month, fostering community participation and a sense of shared responsibility for education. This initiative has created a positive atmosphere, encouraging active involvement from parents and guardians and strengthening the bond between schools and their communities.

BALA & READING CORNER

I have been a strong advocate for the Building as a Learning Aid (BaLA) initiative, which involves using the physical school environment as an educational tool. I encouraged schools to implement BaLA, creating interactive spaces and using everyday objects to enhance learning. Additionally, I promoted the establishment of Reading Corners and Science Corners in classrooms to foster a love for reading and scientific inquiry among students. My efforts in these areas have been supported by writing and publishing guidebooks that help teachers effectively implement these initiatives.

HANGING LIBRARY

To promote a reading culture among students, I introduced the Kuhipath Hanging Library. This innovative library setup provided easy access to books in classrooms, encouraging students to develop a habit of reading. This initiative helped students in better reading proficiency and increased their love for storytelling. This innovative programme was highly praised by the NITI Aayog and Govt. of India.
